POT 1T0

Dear Mayor Lucas,

I'm writing to you to share some news about the NWMO.

Today, the Minister of Natural Resources announced that as part of the Government of Canada's Radioactive Waste Policy Review, the NWMO will be tasked with leading a parallel engagement process with Canadians and Indigenous peoples to inform the development of an integrated radioactive waste management strategy, which will include low and intermediate level types of waste.

The Government has asked us to take on this important work because of the NWMO's ongoing leadership in used nuclear fuel management and public engagement, made possible by the collaboration of community representatives like you.

Given the NWMO's ongoing collaboration with the Corporation of the Township of Ignace, I wanted to contact you directly to make clear that the NWMO's role in this process is separate and distinct from our ongoing work implementing Canada's plan for the safe, long-term management of used nuclear fuel. We will continue to work with you and your community as we advance the site selection process and technical work, mindful of our goal to identify a single, preferred location for a deep geological repository for used nuclear fuel in an area with informed and willing hosts in 2023.

Grounded in our ethical and social framework, our approach to develop a strategy in support of the Government's Radioactive Waste Review will be guided by science, international best practices, and what is most important to Canadians and Indigenous peoples. As always, our values of safety, integrity, excellence, collaboration, accountability and transparency will be central to the design and implementation of this engagement process, which will launch in January 2021.

Conscious of the limitations presented by the COVID 19 pandemic, we will work with you and your community to establish a process that provides a variety of ways to participate, while respecting public health directives.

I have included a short Q&A and we have set up a dedicated website where you can find our news release and accompanying response to the Minister's tasking (www.nwmo.ca/radwasteplanning). I hope these address any immediate questions you may have, until we have time to arrange a more detailed discussion. In the meantime, please do not hesitate to contact me directly or Mahrez Ben Belfadhel, (Tel:647-259-3036, email:bbelfadhel@nwmo.ca).

Sincerely,

Laurie Swami

Q&A

Why was this process launched?

On November 13, 2020, Canada's Minister for Natural Resources asked us to share our engagement expertise and lead the development of a strategy for the safe, long-term management of our country's nuclear waste that would be grounded in what's most important to people.

With decades of experience engaging Canadians and Indigenous peoples, the NWMO is the right organization to lead the development of Canada's Plan for the safe, long-term management of nuclear waste. While nuclear waste is safely managed today, a long-term, integrated strategy for Canada is a next, responsible step.

Outside of what we've been asked to do by the federal government, we have heard that Canadians want action taken now – rather than leaving this to the next generation to deal with.

This process was launched alongside the federal government's development of a new policy framework, on which they are engaging with stakeholders, Canadians and Indigenous Peoples, and is different from the strategy that we are developing. Both the federal government's framework and the strategic plan the NWMO is leading will address existing gaps in the long-term management for intermediate and low-level waste.

What's the role of the Nuclear Waste Management Organization (NWMO)?

The Nuclear Waste Management Organization (NWMO) was asked to lead discussions about a strategy to support Natural Resources Canada's (NRCan) work on a new policy framework for the safe, long-term management of our country's low and intermediate level nuclear waste. Some low-level waste will not be in the scope of our work, since it already has a plan for its long-term management.

As a globally recognized organization with deep expertise and a solid track record, NWMO is a good fit for this role. The NWMO is recognized for engaging citizens and dialogue-driven approaches to project decision making and shared planning. We will work in close cooperation with all levels of government, national and international regulators, Indigenous peoples, industry, academia, and civil society organizations. In developing this strategy, we will gather citizen input, international scientific consensus, and best practices from around the world to ensure that we protect people and the environment long into the future.

How can Canadians and Indigenous peoples participate?

We understand that Canadians and Indigenous peoples are busy during these challenging times, and we want to make it as easy as possible for those who are interested to learn about the issues, share their thoughts and join the discussion in order to shape Canada's strategy going forward.

Collaboration is one of our six fundamental values guiding our work and has been at the core of all NWMO's work, including engaging with government, academia, industry, international experts, and most particularly, with interested Canadians and Indigenous peoples. You can email us your thoughts on the strategy, questions or concerns, attend our live online event(s), and/or answer our online polls. Please register for updates at www.nwmo.ca/radwasteplanning.

We look forward to hearing from you!

Dear Mayor and Council

Subject: Cross Country Skiing

The Mary Berglund Community Health Centre Hub has surveyed the community to determine if there was an interest in cross country skiing in Ignace. To date, we have compiled a list of 15-20 households who have expressed interest in groomed trails.

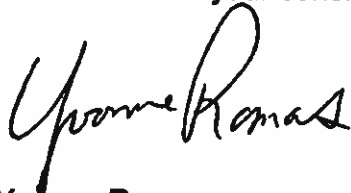

We are currently pursuing partnership opportunities with the Ignace Snowmobile Club, Ignace Golf and Country Club, and the Township of Ignace to discuss the possibility of establishing cross country ski trails at the Ignace Golf and Country Club.

The MBCHC currently has eight sets of adult skis and six sets of youth skis available for public use. Once a need is recognized the intent would be to acquire additional equipment to encourage participation in the sport.

In support of this initiative, we are asking for your permission to establish cross country ski trails at the Ignace Golf and Country Club. We would like to establish and groom a trail that follows the cart path in order to protect the integrity of the greens.

If you have any questions or concerns please do not hesitate to contact me at 934-2290 or by email at mbchcp@bellnet.ca

With thanks for your consideration in supporting our efforts.

Subject: Cities take the lead on climate by calling for gas-power phase out

The City of Hamilton is calling for the phase out of climate polluting gas-fired electricity generation.

City of Hamilton calls for the phase-out of Ontario's gas-fired power plants by 2030

Today, Hamilton City Council unanimously passed a resolution calling on the Government of Ontario to phase-out the province's gas-fired power plants by 2030.

According to the City of Hamilton resolution, a fossil-free provincial electricity system is critically important for the City to achieve its climate goals in part by replacing fossil fuels with electric vehicles, electric buses and electric heat pumps.

The Hamilton resolution was moved by Councilor Brad Clark and seconded by Councilor Brenda Johnson.

Mr. Clark was a provincial cabinet minister in the Harris and Eves Governments which ordered the phase-out of coal burning at the Lakeview Generating Station in Mississauga and committed Ontario to a complete coal phase-out by 2015.

The Hamilton City Council resolution is in response to Premier Ford's plan to increase the greenhouse gas pollution from Ontario's gas-fired power plants by more than 300% by 2025. If this occurs, we will lose 35% of the pollution reduction benefits that we achieved by phasing out our dirty coal-fired power plants.

Last month, the City of Kitchener and the Town of Halton Hills also passed resolutions requesting Premier Ford to phase-out gas-fired electricity generation.

The good news is that Ontario can phase-out its gas-fired power plants and lower its electricity bills with an integrated combination of energy efficiency investments, wind and solar energy and Quebec water power.

What you can do

Please contact Andrea Horwath, Ontario's Leader of the Opposition and MPP for Hamilton-Centre, and ask her and your MPP to call on Doug Ford to phase-out our gas-fired power plants by 2030.

Send a message!

Thank you!

Angela Bischoff

P.S. A big thank you to Don McLean and Hamilton 350 for leading a very successful campaign in Hamilton to stop Enbridge's proposed fracked gas pipeline and building public and municipal support for phasing-out Ontario's gas-fired power plants.

Re: Grey Highlands Council resolution re: Bill 229

Please be advised that the following resolution was passed at the November 18, 2020 meeting of the Council of the Municipality of Grey Highlands.

2020-747

Cathy Little, Dane Nielsen

Whereas the Province has introduced Bill 229, Protect, Support and Recover from COVID 19 Act - Schedule 6 – Conservation Authorities Act; and

Whereas the Legislation introduces a number of changes and new sections that could remove and/or significantly hinder the conservation authorities' role in regulating development, permit appeal process and engaging in review and appeal of planning applications; and

Whereas we, the Municipality of Grey Highlands, rely on the watershed expertise provided by local conservation authorities to protect residents, property and local natural resources on a watershed basis by regulating development and engaging in reviews of applications submitted under the Planning Act; and

Whereas the changes allow the Minister to make decisions without CA watershed data and expertise; and

Whereas the Legislation suggests that the Minister will have the ability to establish standards and requirements for non-mandatory programs which are negotiated between the conservation authorities and municipalities to meet local watershed needs; and

Whereas these proposed changes will impact Ontario's ability to adapt to and mitigate the effects of climate change by undermining the work of conservation authorities to keep development out of high risk areas and protect natural infrastructure; and

Whereas municipalities require a longer transition time to put in place agreements with conservation authorities for non-mandatory programs; and

Whereas municipalities believe that the appointment of municipal representatives on conservation authority Boards should be a municipal decision; and the Chair and Vice Chair of the conservation authority Board should be elected as per the discretion of the conservation authority Board; and

The Municipality of Grey Highlands

206 Toronto Street South, Unit One P.O. Box 409 Markdale, Ontario N0C 1H0

🌐 www.greghighlands.ca ✉ info@greghighlands.ca

Whereas the changes to the 'Duty of Members' contradicts the fiduciary duty of a conservation authority board member to represent the best interests of the conservation authority and its responsibility to the watershed; and

Whereas conservation authorities have already been working with the Province, development sector and municipalities to streamline and speed up permitting and planning approvals through Conservation Ontario's Client Service and Streamlining Initiative; and

Whereas changes to the legislation will create more administrative burden and costs for the conservation authorities, and their municipal partners, and potentially result in delays in the development approval process; and

Whereas the combined contribution of municipal levy and self-generated revenues support 93% of the Grey Sauble Conservation Authority budget; and

Whereas the Provincial contribution to this budget is 7%, the majority of which is for Drinking Water Source Protection; and

Whereas municipalities value and rely on the natural habitats and water resources within our jurisdiction for the health and well-being of residents; municipalities value the conservation authorities' work to prevent and manage the impacts of flooding and other natural hazards; and municipalities value the conservation authority's work to ensure safe drinking water; now

Therefore be it resolved that the Province of Ontario work with conservation authorities to address their concerns by removing Schedule 6 from Bill 229 which affects changes to the Conservation Authorities Act and the Planning Act; and

That the Province of Ontario delay enactment of clauses affecting municipal concerns; and

That the Province of Ontario provide a longer transition period up to December 2022 for non-mandatory programs to enable coordination of conservation authority-municipal budget processes; and

That the Province respect the current conservation authority/municipal relationships; and

That the Province embrace their long-standing partnership with the conservation authorities and provide them with the tools and financial resources they need to effectively implement their watershed management role.

CARRIED.

Sincerely,

Raylene Martell
