

March 4, 2024, Ignace ON.

From February 28, 2024, to March 1, 2024, Ignace Council members alongside Township residents selected to represent the community, attended the Canadian Nuclear Association national conference in Ottawa to learn more about and meet with industry officials and network with other communities, First Nations and government stakeholders. The conference was the biggest yet held by the Canadian Nuclear Association in Canada with over 1200 delegates from all over the world. " It is rewarding that we have been provided these exceptional learning and educational opportunities to meet with international industry leaders and to understand Nuclear and other forms of energy better for Ontario and Canada. We are very happy that some of our residents in Ignace were also able to join us and bring back important research- based information to the community that can be shared throughout our willingness process", stated Mayor Kim Baigrie.

The group attended the conference alongside other communities including South Bruce, First Nations, and government stakeholder partners as well as officials from NWMO and others from across the country.
