

Revita in Ignace

Revita Communities in Ignace

Building housing for the people powering Ignace's growth.

About Revita

Revita's mission is to create affordable housing for Canadians through pragmatic solutions that help address Canadian communities' housing shortages.

Why Prefab, Why Land-Lease

By using prefabricated homes and a land-lease model, we're able to lower the cost of homeownership by roughly 30-40% compared to traditional builds, and get homes built and ready faster.

- Prefab construction means homes go up faster, with fewer delays and lower costs
- Residents own their home while leasing the land it sits on, which keeps the upfront price of homeownership within reach
- As communities grow, we reinvest in amenities and upkeep, so they keep improving over time

Ignace is a natural fit for this mission: a community with real workforce housing needs and a Township ready to grow.

Supporting Ignace's Economic Development Goals

The Township of Ignace is focused on strengthening its local economy — building the right capacity to accommodate the right investments as it positions itself for long-term, sustainable growth.

Revita's investment in Ignace reflects exactly the kind of development the Township's Community Improvement Plan is designed to support private capital addressing a real, local need — housing for the workforce powering Ignace's growth.

Our Commitment to Ignace

Revita's investment in Ignace has two parts:

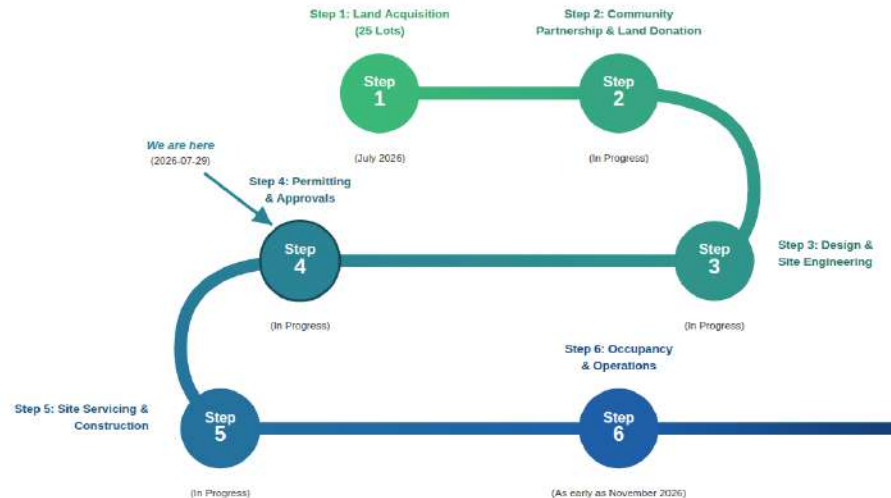

1. **Workers' Housing** — Revita has acquired 25 lots to develop housing for the growing local workforce, helping the Township meet demand from major employers as Ignace's population expands.
 2. **Affordable Housing** — More information to come.
